QUANTUSSERIES

A great name for high precision Data Acquisition.

(Latin) adjective

quan·tus | /ˈkwɒnt3ːs/

~ HOW **MUCH** AND HOW **GREAT**

ICP®
VOLTAGE
TACHO
TEMPERATURE
STRAIN
PT100
MICROPHONE
OUTPUT VOLTAGE
TIME AND POSITION
DIGITAL
PIEZOELECTRIC CHARGE.

QUALITY AND QUANTITY

it's not often you get both

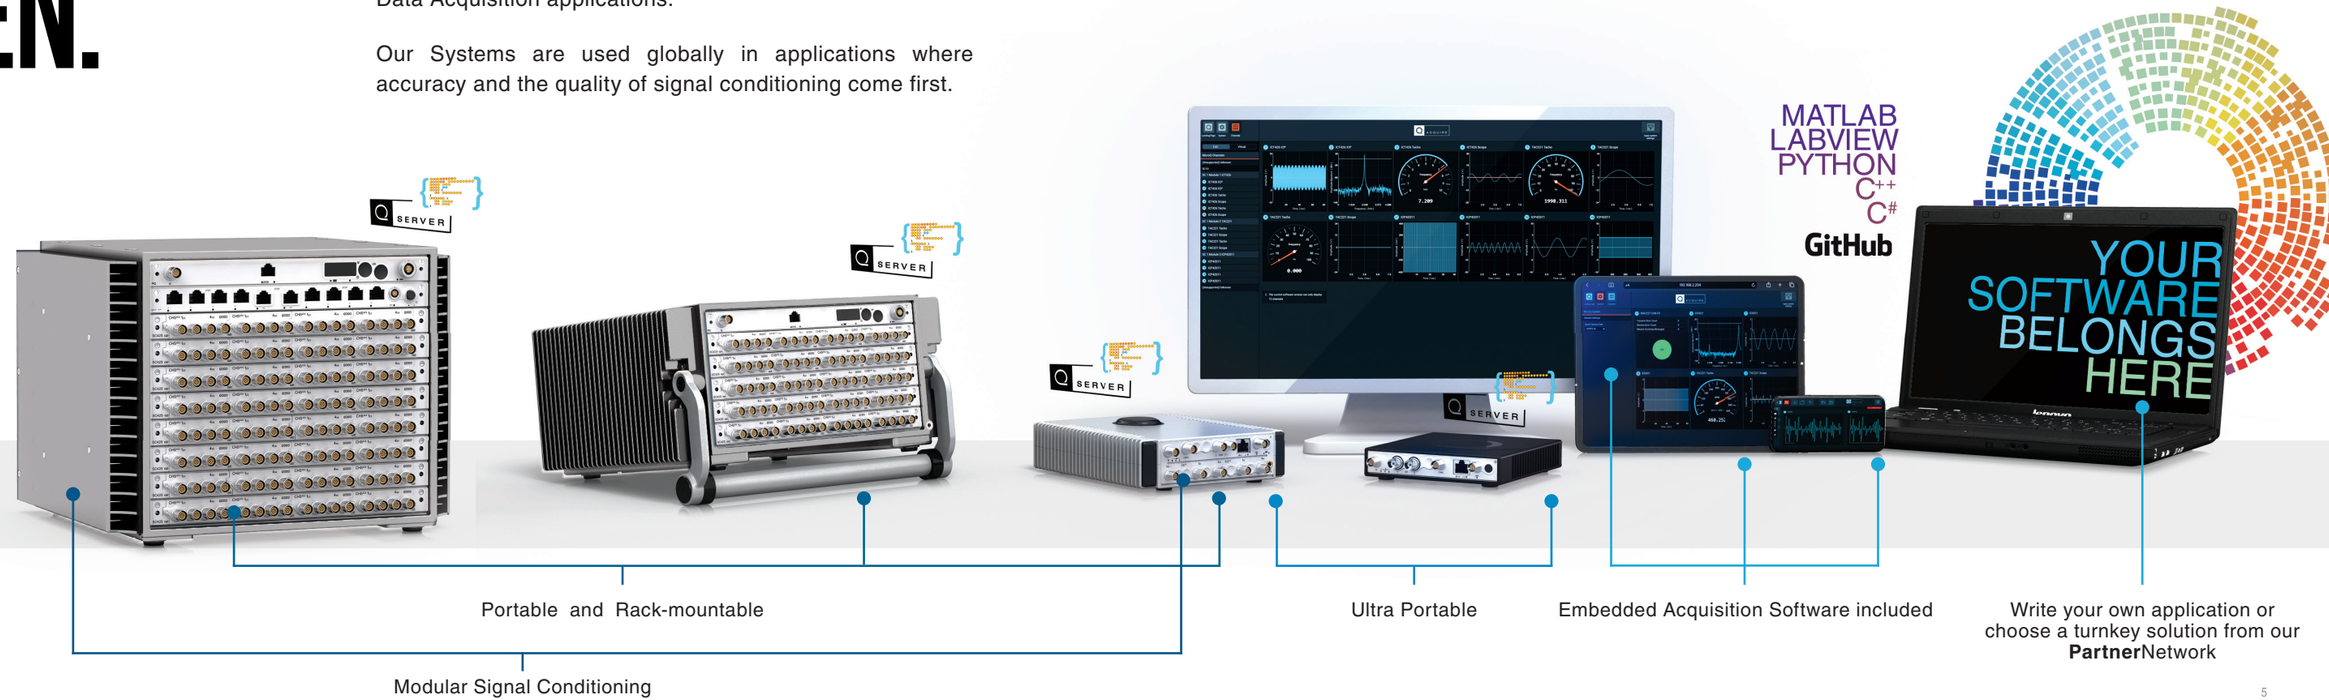
Since 1984.

More than 150 000 Channels in the market.

Integrated but **OPEN.**

The **Quantus**Series is more than just an acquisition System. Together with our Software Partners, it is a complete suite of tools for Structural Acquisition and the most demanding Data Acquisition applications.

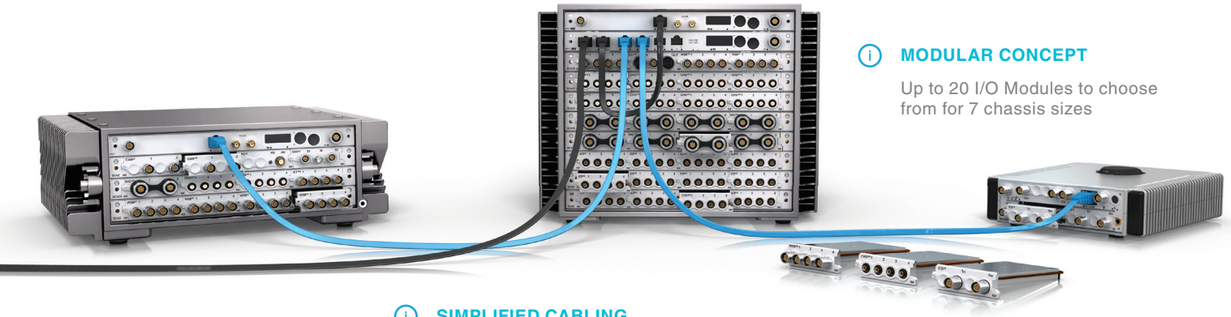
Our Systems are used globally in applications where accuracy and the quality of signal conditioning come first.



Readily

EXPANDABLE.

Whether you are swapping out Modules for different tasks or synchronizing Systems for higher channel counts and distributed positions, the freedom to grow your measurement landscape is yours.



MODULAR CONCEPT

Up to 20 I/O Modules to choose from for 7 chassis sizes

SIMPLIFIED CABLING

For multi-system configurations; PTP Synchronization and PoE Power can be provided through one cable using a **Quantus**Series SP[45] PoE switch.

WHAT ARE WE REALLY GOOD AT?

1. **INSIDE**
   High sampling rates, high bandwidth, low noise floor. Unrivalled signal conditioning.

2. **OUTSIDE**
   Singular platform, rugged design, portable and compact high-channel density modular Systems.

3. **FREEDOM**
   I/O Module options to choose from, tethered or independent measurement options and synchronization for larger distributed measurements with simple cabling.

4. **OPEN**
   Flexible software options, from a REST interface to full turnkey solutions for advanced applications, in collaboration with our **Partner**Network.

5. **LASTING VALUE**
   Modular, partially upgradable Systems providing a lasting investment that keeps up with the latest technological advancements.

   World-class calibration and support services to keep your System healthy for up to 15 years.

   One company, all in-house and with a team dedicated to unsurpassed levels of quality.

LASTING VALUE

UNRIVALLED SIGNAL CONDITIONING

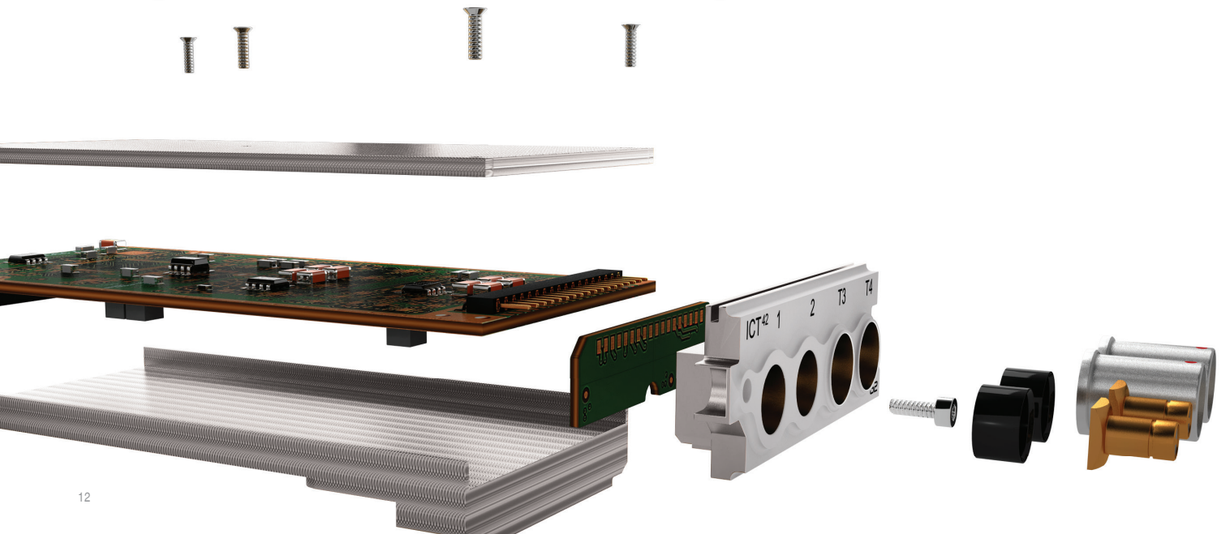
- 204.8 kSa/s with 24-bit resolution (up to 5 MSa/s).
- Low noise floor.
- Phase accuracy.

ALL IN ONE

- Supports real time data alignment, resampling, slow speed channels and more – all in the frontend with no need for external signal conditioning.
- Signal conditioning, analog to digital converter and computing – all in one.

UNRIVALLED

Signal Conditioning.



ALL MODULES INCLUDE THE FOLLOWING FEATURES:

- 50 V galvanic isolation from one Module to another
- Automatic internal calibration capability
- All settings are software configurable
- Very high channel density
- Excellent signal to noise performance
- Excellent spurious free-dynamic range, total harmonic distortion and crosstalk
- Finely tuned for the best performance at the lowest possible power
- Protection to accommodate both transient and continuous over-voltages
- Strong Electromagnetic Interference (EMI) screening for lower noise floor
- Firmware protection from excessive external EMI events
- Low power consumption

ANALOG

PARAMETER	MAXIMUM DATA RATE	MODULE	MODULE DESCRIPTION
±10 V voltage input	409.6 kSa/s	ALI	2 channel Voltage Input
ICP® based microphones, accelerometers, load cells and pressure sensors ±10 V voltage input	51.2 kSa/s	WSB	4 channel Bridge / ICP®/ Voltage Input
	102.4 kSa/s	ICS	6 channel ICP®/ Voltage Input
		CHS	6 channel Charge / ICP® / Voltage Input
	204.8 kSa/s	ICT	2 channel ICP®/ Voltage Input
		ICP	4 channel ICP®/ Voltage Input
		MIC	2 channel Microphone / ICP®/ Voltage Input
		WSB	4 channel Bridge / ICP®/ Voltage Input
		CHM	4 channel Charge / ICP® / Voltage Input with Buffered Outputs
±60 V voltage input	204.8 kSa/s	ICT	2 channel Tacho / ICP®/ Voltage Input
		ICP	4 channel ICP®/ Voltage Input
Tacho pulse input with 4.9 MSa/s Scope Mode	700 kPulse/s[1]	ICT	2 channel Tacho

Note 1: *Pulse rate for sum of both channels*

In addition to the quality of analog signal processing and sensor support, every System in the **Quantus**Series family uses state-of-the-art digital processors to further process and manage signal information. Processing in the front-end hardware improves phase accuracy, effective bandwidth, and scalability of the System for real-time measurements.

ANALOG

PARAMETER	MAXIMUM DATA RATE	MODULE	MODULE DESCRIPTION
Piezoelectric based accelerometers, load cells, etc. (Single-Ended)	102.4 kSa/s	CHS	6 channel Charge / ICP® / Voltage Input
	204.8 kSa/s	CHG	4 channel Charge Input
		CHM	4 channel Charge / ICP® / Voltage Input with Buffered Outputs
Piezoelectric based accelerometers, load cells, etc. (Differential)	204.8 kSa/s	DCH	2 channel Differential Charge Input
E, J, K, T and U thermocouples as well as Pt100 sensors ±10 V voltage input	6.4 kSa/s	THM	8 channel Thermocouple / Pt100 / Voltage Input
Current and Voltage excited strain gauges including dynamic strain. load cells, pressure sensors, strain based accelerometers, inductive displacement (LVDT) and rope displacement sensors ±10 V voltage input	51.2 kSa/s	WSB	4 channel Bridge / ICP® / Voltage Input
	204.8 kSa/s	WSB	4 channel Bridge / ICP® / Voltage Input
Bridge and Resistive Sensors used in Pyro-Shock / Mechanical Shock ±5 V voltage input	1.25 MSa/s	ALI @1250	2 channel Bridge / ICP® / Voltage Input
	2.5 MSa/s	ALI @2500	
	5 MSa/s	ALI	
Acoustic Camera with ICP® and ±10 V voltage input	102.4 kSa/s	ACM	24 channel Acoustic Camera
200 V or non-polarized microphones	204.8 kSa/s	MIC	2 channel Microphone / ICP® / Voltage Input

TIME, POSITION AND COMMUNICATION

GPS	10 Hz	GPS	GPS Receiver for Time Synchronization and Position
CAN	2 Mbit/s (simultaneous)	CAN	2 channel CAN bus Interface

OUTPUT

±10 V Signal Outputs: DC, Sine, Triangle, Square, and White Noise	204.8 kSa/s	ALO	4 channel Analog Output

MONITORING

Note 1: *Pulse rate for sum of both channels*

Buffered outputs for external monitoring of the conditioned input signals	98 kHz bandwidth	ALO	4 channel Buffered Analog Output
	204.8 kSa/s	CHM	4 channel Charge / ICP® / Voltage Input with Buffered Outputs
	2.375 MHz bandwidth	ALI	2 channel Buffered Analog Output

Note 1: *Pulse rate for sum of both channels*

#developer

Empowering.

With the **QServer** REST interface, developers can effortlessly interact with the System, eliminating the need to delve into intricate hardware configurations. This streamlines the development workflow and empowers developers to concentrate on the core functionalities of their application, ensuring efficiency and ease of use.

- A REST API for easy measurement setup.
- Customizable data streaming formats allow developers to choose between high-performance applications and ease of use.
- Utility Libraries that can be integrated into applications to facilitate:
  - The discovery of devices on the network.
  - Upgrading the software running on the device.
  - The download and conversion of Internal Data Storage data to standard data formats.
  - A plug-in-style customer data exporter interface to expand on the formats available for Internal Data Storage conversion.
  - Thin interface libraries for strongly typed languages (such as C#). These interface libraries help convert strongly typed values in the developer's application to their REST counterparts, reducing the integration time.

THE DIFFERENCE IS US.

From custom cabling to solutions that enable our instrumentation to fit seamlessly with your measurement architecture, our in-house design and production capabilities are ready to create custom infrastructure to integrate with your measurement landscape.

MECALC works closely with our partners to meet the evolving trends in Test and Measurement applications. With one of the largest in-house development teams in the industry, we have the resources to work closely with our partners to meet new challenges.

CUSTOM MADE MOBILE MOUNT WITH INTEGRATED BNC CONNECTORS

Welcome to your next

investment in capital equipment.

QuantusSeries Systems are designed with the long-term in mind. Our modular concept keeps our Systems updated with the latest technological advances. Components from different generations can coexist in the same System, allowing Systems to be partially upgraded as needed.

MECALC's in-house development team is one of the largest in the industry and regularly adds the latest technological advancements to the **Quantus**Series. Upgrades to support the latest sensors, improve signal quality, and support new applications are continuously added to the I/O modules. Also, new system designs offer faster data processing and transfer, lower power consumption, and increased channel count.

Contact MECALC for more information about upgrade campaigns and new product releases.

WE KEEP UP.

MODULAR UPGRADES

Recycle and Upgrade.

Calibration

and system health check.

Optional ISO/IEC 17025 accredited calibration is available for all new **Quantus**Series Systems

MECALC's ProCal calibration service includes a full factory test of the entire System and exercises all measurement modes on the instrument as a comprehensive manufacturer's proprietary calibration. This calibration option verifies measurement accuracy plus the correct operation of internal voltage references, grounding, AC coupling, filters, noise performance, excitation voltage, integrity checking, digital channels, all connector pins, Signal Conditioning cards, Wi-Fi, SSD, batteries, handles, buttons, and many more.

These tests ensure **Quantus**Series Systems continue to operate as specified at every stage of their life cycle.

The **Quantus**Series is a highly modular System and ProCal is designed for Systems that will be reconfigured in the field. Swapping or moving Modules between slots or Systems can then be done with confidence. And, the validity of a System calibration is preserved when a defective Module is replaced with a calibrated Module of the same type.
